JOURNEY & GLOBAL IMPACT

FGC Singapore

International FIRST Global Challenge (FGC) Participant

FGC Singapore (Oct 2023) & Switzerland (Oct 2022)

- Represented the national team two times in global robotics competitions.
- **Switzerland:** Worked on hardware integration and sensor calibration for the Carbon Capture mission.
- **Singapore:** Collaborated with international teams to optimize robotic logic for the Hydrogen Horizons challenge.
- Applied critical thinking to hardware integration and sensor programming under high-pressure environments.

Team Pakistan in Geneva

FGC Geneva, Switzerland

JOURNEY & GLOBAL IMPACT

Live Matches Team Pakistan at Geneva

WHAT THIS ROBOT DOES?

We built this robot in just three months, overcoming numerous failures and learning invaluable lessons under the guidance of our mentors. Designed for the 2022 Carbon Capture challenge, the robot's primary job is to collect black balls (representing CO₂) and deposit them into a central sink to simulate removing emissions from the atmosphere. It can also deliver these balls to corner compressors for human assistance, and it finishes each match by securing "long-term storage" through parking on the sink's base platform or hanging from its cantilevered bars.

WHAT IS FIRST GLOBAL & COMPETITION?

The FIRST Global Challenge (FGC) is an annual, "Olympics-style" robotics competition uniting youth from 190+ countries to solve the world's greatest engineering challenges. Since 2017, it has used themes like Carbon Capture (Geneva 2022) and Hydrogen Horizons (Singapore 2023) to teach global diplomacy through technology. Its core impact is "Coopertition"—fostering a generation of leaders who prioritize international collaboration and STEM innovation to create a sustainable, unified future.

LEADERSHIP

Highlighting communication skills and organizational impact

Vice President – Society of Robotics & Emerging Technologies (SRET)

Project: Robotron '26

- **Strategic Leadership:** Led the end-to-end planning and execution of ROBOTRON '26, managing a large-scale competition for 50+ teams.
- **Operational Management:** Directed complex logistics, vendor coordination, and on-ground execution from initial setup to event closing.
- **Team Supervision:** Recruited and led a volunteer workforce, effectively delegating tasks and coordinating between staff and external stakeholders.
- **Brand & Scalability:** Established the event's visual identity and professional standards, building a scalable framework for future mega-scale competitions.

PUBLIC ADVOCACY & MEDIA RECOGNITION

Highlighting communication skills and organizational impact

Morning Show, October 2022

NATIONAL MEDIA FEATURE

Following our representation of Pakistan in Switzerland, we were invited by Samaa TV to share our journey on their morning show. Being on live national television at just 17 years old was a proud milestone that allowed us to showcase our global success—securing a position in the 8th Alliance. Despite the pressure, I spoke about our technical work to a national audience, representing our team's hard work. This experience was vital because it gave us a platform to prove that Pakistani youth can compete at the highest level, turning our international achievement into a source of national inspiration.

Ailaan Podcast Show, October 2023

PODCAST GUEST

Following our return from Singapore, the high level of public curiosity about how to enter the STEM field led to my invitation to several podcasts. I used these platforms to share our journey and provide a practical roadmap for aspiring students interested in robotics. These sessions were vital for demystifying engineering and "learning by doing," allowing me to turn my international experience into an accessible guide for the next generation of Pakistani innovators.

LEADERSHIP

Highlighting communication skills and organizational impact

Assistant Judge | Track The Line

Project: Robothon 2.0 | The Elixir School | Align STEM Club

- **Technical Inspection:** Verifying that robots meet specific size and weight constraints before they enter the arena.
- **Precision Monitoring:** Closely observing robot performance to ensure sensors stay within the designated lane and tracking any "line breaks" or restarts.
- **Data Accuracy:** Recording lap times and penalty points with high accuracy to assist the Head Judge in final scoring.
- **Fair Play Enforcement:** Monitoring for manual interference or hardware malfunctions, ensuring all teams compete under the same rigorous standards.

Aaj News, while judging

shield for Judges, Track the line

Assistant Judge & Volunteer | LFR Indigenous Category

Project: Robotron 2.0 | The Lab School

- **Technical Officiating:** Evaluated Line Following Robots (LFR) for technical compliance and autonomous navigation accuracy.
- **Performance Monitoring:** Recorded precise lap times and enforced track regulations, including line-break penalties and restarts.
- **Operational Flow:** Managed team transitions and pre-match inspections to ensure the indigenous category stayed on schedule.
- **Integrity Assurance:** Verified that all hardware met specific category criteria, ensuring fair play and technical standards across all teams.

Backbone of the Event

PROFESSIONAL EXPERIENCE

10x Digital Ventures | Marketing & Creative Support

Demonstrating "T-shaped" growth across digital and operational domains.

May 2024 – Present | Apprenticeship

- Managing digital growth strategies, personal branding, and market research.
- Executing end-to-end content cycles: copywriting, video editing, and LinkedIn optimization.
- Handling PR (WhatsApp, international calls, meetings, and course sales), managing client queries, editing Course using my video editing skills, and currently assisting with his financial reconciliation.

Head of Volunteers | Zeeshan Usmani |

Large-Scale Operations & Leadership

AGENTIC AI & THAK GAYE HO NA?

- **Team Coordination:** Successfully led a team of 12 volunteers and managed 600+ attendees.
- **Crowd & Logistics Management:** Overseeing entry flow, seating arrangements, and backstage logistics to ensure a seamless experience for participants and guests.
- **Real-time Problem Solving:** Acting as the primary point of contact for troubleshooting execution challenges and adapting strategies on the fly to maintain order and efficiency.

Receiving Certificate for Head of Volunteers

Team for the managing the event

Experimenterz | Social Media Manager & STEM Workshop Assistant

March 2020 – 2022 | Part time

- Oversaw social media content and planning. Assisted in 3D modeling & printing workshops and helped with student engagement.
- Assisted for 2 months during summer camps in STEM-based projects at Al-Burhan (Al Atfaal).

EDUCATION

The Lab School

A-levels, Comp, Maths, Phys

2024 – 2026

Activities and societies: Led Robotics Events

The Lab School

O-levels, Science

2020 – 2024

Grade: B

Activities and societies: STEM | Robotics | 3D Designing & Printing | Sports

IBA GRADS | CHAJA AO

ECAT, Engineering · (October 2025 – June 2026)

Al Burhan

1 year ilm e deen course , Islamic Studies · (September 2022 – November 2023)

Madarsah Bait ul Ilm

Hifze Quran

September 2013 – November 2016

CERTIFICATIONS

- Fundamentals of Digital Marketing – Google Digital Garage
- WordPress Masterclass (Basic) – Alison
- LinkedIn Optimization Course – Coursera
- First Global Challenge – Switzerland & Singapore
- Edvon Robotics League 5.0
- Robothon 2.0 – The Elixir School (Assistant Judge)
- Robotron 2.0 – The Lab School (Assistant Judge)
- CS50's Introduction to Programming with Scratch

Closing Statement:

My journey from international robotics to national media has taught me that technology is the greatest tool for impact. I am now ready to bring this experience to University, where I aim to excel in Computer Science and contribute actively to the university's innovation culture

Note: All the certificates and documents are attached.
