Syed Hashir Ali

@ GUTECH '30 | Event Operations Lead & Tech Enthusiast | BSCS
| Technical execution & operational leadership
Karāchi, Sindh, Pakistan

Summary

Computer Science student at GUTECH '30 with practical exposure to technical projects, STEM initiatives, and event operations, working at the intersection of technology, people, and execution. I enjoy turning ideas into organized systems by planning, coordinating teams, and managing real-world experiences. I consider myself a T-shaped learner—building depth in computer science and software development while actively exploring adjacent fields such as digital growth, technology management, and community-driven initiatives. This allows me to connect dots across disciplines rather than operate in silos. Through involvement in technical competitions and international STEM environments, I've developed strong problem-solving skills, adaptability, and the ability to collaborate across diverse teams and cultures. Above all, I've learned how to learn. There's no magic, assign me a task or a domain I've never seen before, and I will figure it out, acquire the necessary skills on the go, and deliver a reliable solution.

Experience

GU TECH (Ghazali University School of Technology)

Educational Outreach Representative

August 2026 - September 2026 (2 months)

Honored that GU TECH trusted me with this outreach role even before officially starting my academic journey here. It's my first time in this space, and receiving ongoing mentorship from university faculty in consultative outreach makes it an incredible learning experience.

What I Do:

Key Responsibilities & Contributions:

Student Counseling & Guidance: Advised prospective students on academic pathways while tracking applicant progress across the admissions pipeline.

Data Analysis & Strategic Reporting: Synthesized applicant feedback, communication logs, and status remarks into analytical summaries for faculty and management to inform key decision-making.

Cross-Functional Coordination: Acted as a direct liaison between applicants, professors, and university leadership to streamline intake workflows and refine outreach strategies.

Grateful for the mentorship and excited to keep building efficient systems while supporting the incoming cohort!.

The Lab School

Event Operations & Branding Lead - First Gear Robotron'26 - SRET
October 2025 - March 2026 (6 months)

Karāchi

Event: ROBOTRON '26 — Robotics & Innovation Competition

Society of Robotics & Emerging Technologies, The Lab School

Role: Vice President

- Led end-to-end planning and execution of ROBOTRON's Inter-House event with 50+ teams
- Translated the event concept into a structured, actionable execution plan
- Directed overall branding, visual identity, and presentation standards of the event
- Managed operations, logistics planning, and vendor coordination under tight timelines
- Coordinated between students, staff, and external resources for smooth execution
- Recruited, assigned, and supervised student volunteers with clear task delegation
- Oversaw complete on-ground management from setup to closing
- Handled real-time problem solving, last-minute changes, and execution challenges
- Established the operational foundation for a future mega-scale ROBOTRON event

10xDigitalVentures

1 year 4 months

Zeeshan Usmani Event - Head of Volunteers (Operations) – Volunteer January 2026 - January 2026 (1 month)

Karāchi, Sindh, Pakistan

- Led event-day operations for two large-scale events with 450+ and 600+ attendees, ensuring smooth execution in high-pressure, time-sensitive environments.
 - Coordinated and led a 12-member volunteer team during live operations, managing entry flow, seating arrangements, and backstage logistics. Served as the on-ground point of contact for volunteers, organizers, and attendees, adapting communication style to maintain control and efficiency.
 - Handled real-time problem-solving and crowd management during peak hours.
- Gained hands-on exposure to operations leadership, team coordination, and live-event execution.

Marketing & Creative Support

October 2024 - January 2026 (1 year 4 months)

Karāchi

Current focus: Independent client finance management

I have worked in a hybrid setup and learned through hands-on experience every day.

My role covers a wide mix:

- Taking Business Online
- Personal Branding & Growth
- Graphic Design
- Video Editing
- Copywriting & Content Writing
- Social Media Management
- LinkedIn Marketing & Profile Optimization
- PR Handling & Course Management
- Brand Analysis & Strategy
- Presentations & Brand Guidelines
- Market Research
- Marketing Budget & Expense Reconciliation

Contributed to personal brand growth and digital marketing initiatives while
Gaining hands-on experience in all aspects of content and strategy

Experimenterz

STEM Program & Social Media Manager

January 2022 - January 2023 (1 year 1 month)

Karāchi, Sindh, Pakistan

As a STEM Program & Social Media Manager at Experimenterz, I led the creation and execution of engaging visual content, including photography, videography, and graphic design for social media, posters, and promotional materials. I developed and implemented a strategic social media calendar to enhance audience engagement while assisting in teaching STEM topics and managing the resources required for workshops and summer camps. By collaborating on the planning and execution of these events and analyzing engagement metrics, I refined our content strategies to maximize reach and impact, contributing to brand growth and community engagement.

FIRST Global (IFCA)

International FGC Robotics & STEM Competition Participant | Geneva & Singapore

August 2022 - October 2022 (3 months)

Karāchi

Attending the First Global robotics competition in Switzerland was my first experience in a global STEM event. It provided me with a unique opportunity to collaborate with teams from around the world and work on innovative solutions to real-world challenges. This experience significantly expanded my knowledge in robotics and STEM, while enhancing key skills such as:

- Robotics: Building and programming robots for complex tasks.
- Teamwork & Collaboration: Working in a diverse, international team to strategize and problem-solve.
- Problem-Solving: Applying critical thinking to tackle technical and logistical challenges.
- Leadership: Leading team discussions and guiding efforts toward achieving our goals under pressure.

This event ignited my passion for innovation and global collaboration, motivating me to continue exploring new technologies and contributing to future solutions in robotics and beyond.

Experimenterz

STEM Facilitator | Al- Burhan × Experimenterz

May 2021 - July 2021 (3 months)

Karāchi, Sindh, Pakistan

Experimenterz × Al-Burhan Atfaal/Shabab

Assisted in delivering STEM-based learning activities and projects for students as part of the Experimenterz program. Supported hands-on experiments, basic robotics concepts, and creative problem-solving sessions. Contributed to creating an engaging learning environment while helping students understand core STEM concepts through practical exposure.
